

Industrial Products

Silicone Rubber Rollers

PPI is equipped to produce standard sized rubber rollers and custom precision Silicone rubber rollers as per the client specifications. Our Silicone rubber rollers are used in a variety of applications including banding, laminating, printing and decorating. Carefully engineered and crafted, PPI Silicone rollers are specifically produced to match the application.

Features

PPI manufactures a wide range of Rubber Rollers for different industrial applications. High quality specially designed rubber compounds coupled with durable steel or aluminum parts are designed for long-lasting and effective roller solutions. Simplified design and structure of PPI rubber rollers makes convenient installation. PPI rubber rollers are able to support heavy loads and extreme temperatures effectively through improved material formulations for their respective sizes. Availability of custom designs and roller sizes offer the clients a wide range to choose from that fits their specific requirements.
