Rubber mats with different thicknesses to suit multitude of applications where a specially designed rubber formulation as per the ASTM D 2000 international standard introduces a soundproofing membrane cancelling the excessive noise. The PP resilient rubber mat is designed to block and reduce airborne noise through stud walls and timber joisted floors in different locations. A thin, effective Sri Lankan sourced premium quality natural rubber loaded soundproofing mat designed to block and reduce airborne noise transmission through stud partitions, timber joisted floors and ceilings

Product Features

- Anti-Static and Fire Resistant
- Sound cancellation feature
- Anti-slip and Anti fatigue characteristics
- Convenience in installing and storing
- Interlocking system to prevent sheets from moving
- Cancels our floor squeaking and other air borne excessive noise
- Unlike cheaper foams rubber mats, remains continually elastic
- Suitable on timber and concrete flooring
- Excellent foot fall noise reduction properties
- Good Thermal conductivity
- Minimum construction and low floor build up
- It is equal to lead off the same mass in effectiveness and acts as a thin de-coupling sound blocker
- One layer of Soundproofing Mat has an insulation value of 36dB.

The Optimum Rubber Solution: An Engineered Approach to all your flooring mats requirements

“Reliance on suppliers’ interpretations of your material requirements can lead to underperforming or over-engineered components. Both result in unnecessarily high costs. Polymer Products formulate the materials and manufacture the components, so you can trust our experts to find the best solution for your business.”
